## Opioid Naloxone Emergency Response & Training

ONEbox® provides a compact, durable, and easily-deployable solution. By combining immediate *naloxone access*, easy-to-understand *video instructions*, and *hands-on training*, ONEbox® ensures that students, faculty, and staff are equipped to respond effectively in an overdose situation.

### Product Overview

#### ONEbox® Classic / \$150

A durable, lightweight, and mountable or transportable box containing 3 pieces of PPE (Personal Protective Equipment), a high-resolution video screen with a 1-minute bilingual emergency instruction video, a 5+ minute training video, a tagging system for inventory management, and a charging cord. The box holds user-supplied naloxone.

#### ONEbox® Co-Location / \$100

A high-resolution video screen with a 1-minute bilingual emergency instruction video, a 5+ minute training video, 2 pieces of PPE, and a charging cord. It attaches via double-stick tape and is designed for installation in various locations, including vending machines, AEDs, fire extinguishers, and first aid kits, and other overdose response boxes for enhanced opioid overdose emergency response.

#### ONEbox® Flex / \$50

A mountable or transportable version of the ONEbox® with a QR code directing users to the same emergency video as the ONEbox® Classic. It includes 3 pieces of PPE, written instructions, a tagging system, and an installation/maintenance SOP.

*Optional Co-Location can be added to update Flex with video for an additional charge.*

*Note: These products do not ship with naloxone, but bundled pricing with naloxone is available upon request.*
